Turning Green: Argentina´s plan to reach 20% of renewable energies by 2025

"The world is committed on the renewable energy production agenda we need".

Mauricio Macri, president of the Argentine Republic

Next Friday 24th of June, from 10-11.30am The Argentine Ambassador, Carlos Sersale di Cerisano, will hold a meeting with key players in the sector to introduce the first round of RenovAr program "First 1000MW Call for Tenders of Renewable Energy Generation Projects) with specialists Sebastián Kind, Undersecretariat of Renewable Energy (Ministry of Energy and Mines) and Mauro G. Soares, National Director for Renewable Energy (Ministry of Energy and Mines).

Argentine Embassy- 65 Brook Street W1K 4AH

Register for attendance: investments@argentine-embassy-uk.org

- RenovAr seeks to transform Argentina's energy matrix to protect the environment. It also aims to reduce the emission of two million tons of carbon dioxide per year
- Today: renewable energy covers, today, 1.8% domestic demand.
- Objective: add 1,000 megawatts to the country's energy supply within the next 24 months.
- Investment: estimated between $1,5 to $2,0 billion.
- Turning green: Argentina is committed to reach 4.5% in 2019, and 20% —the equivalent to 10,000MW—by 2025.
